E-safety: keeping safe when using technology

When we use technology, we need to follow rules to keep us safe. There are lots of benefits to having rules including making sure we don't see things that could upset us (linked to lesson 5).

Vocabulary

technology Objects made by people to help us

Mouse/ mice Handheld device/s that moves a computer cursor

Plugged in Needs batteries or electricity to work

cursor Movable pointer on a computer screen

screen Flat panel on viewing area of a computer.

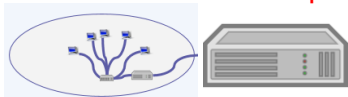

keyboard Device use for writing on a computer.

What?

1

We have **technology** all around us to help us find things out and make our lives easier.

Does it all need to be **plugged in**?

2

A computer is one type of technology that uses a **screen**, keyboard and mouse to work. A **mouse** is useful to help us click on different parts of a screen with a **cursor**.

3

A **keyboard** is an important piece of technology to help us type words on a computer. It uses the alphabet and number as well as symbols..

4

Keyboards and **mice** can be used together to open, edit and save work we create.

5

Rules are made to keep us safe, help us learn and keep us happy in life and online. We also follow rules when using technology.
