

Year 6 webpage creation

Computer Science

Digital Literacy

Information Technology

Year 4 creating media

E-safety: find my media balance

Thinking about media choices that are healthy and those that aren't. Do they help us make responsible choices in the real world? Creating a media plan will help create a healthy balance of media use.

Vocabulary

| | | | |
|------------------|--|------------------------|--|
| HTML | Hypertext Markup Language | homepage | Working together on shared documents |
| website | Selection of webpages on the internet under a single domain name. | Navigation path | Breadcrumb trail through a website to allow you to move between pages. |
| copyright | A law that protects content and images from being used by others without permission. | External link | Webpages or websites of other peoples that you link to your own. |

What?

1

The internet is full of **websites** with one or more webpage of information on. The **HTML** is a special code that is unique to every website. Think about what makes a good website?

2

All websites have a purpose and need to be user friendly in their layout. Images used help us to understand what the website is about but are they **copyright** and why?

3

The **homepage** on a website gives the first clues about information for the whole site. It's important to preview your layout to make sure it's user friendly and easy to navigate.

4

When we use a website, it's important to be able to get back to the homepage and other pages when needed. You need to plan a **navigation path** carefully to do this.

5

Linking your webpage to other pages or websites as an **external link** is okay but needs to be purposeful. Copyright needs to be considered as well as whether it's trustworthy and secure or not.
