## To convert units of metric length

Research the following geographical facts. Then, convert the measurement into other units of metric length.

Don't forget to use the conversions to help you!

| Height of Mount Kilimanjaro |            |                  |                  |
|-----------------------------|------------|------------------|------------------|
| Kilometres (km)             | Metres (m) | Centimetres (cm) | Millimetres (mm) |
|                             |            |                  |                  |
|                             |            |                  |                  |

| Height of The Great Pyramid of Giza |            |                  |                  |
|-------------------------------------|------------|------------------|------------------|
| Kilometres (km)                     | Metres (m) | Centimetres (cm) | Millimetres (mm) |
|                                     |            |                  |                  |
|                                     |            |                  |                  |

| Length of River Nile |            |                  |                  |
|----------------------|------------|------------------|------------------|
| Kilometres (km)      | Metres (m) | Centimetres (cm) | Millimetres (mm) |
|                      |            |                  |                  |
|                      |            |                  |                  |

| Height of Victoria Falls |            |                  |                  |
|--------------------------|------------|------------------|------------------|
| Kilometres (km)          | Metres (m) | Centimetres (cm) | Millimetres (mm) |
|                          |            |                  |                  |
|                          |            |                  |                  |

| Length of the Equator |            |                  |                  |
|-----------------------|------------|------------------|------------------|
| Kilometres (km)       | Metres (m) | Centimetres (cm) | Millimetres (mm) |
|                       |            |                  |                  |
|                       |            |                  |                  |
