# Interpreting Pie Charts

36 people took part in a survey. They were asked what their favourite activity has been during lockdown. Below shows a pie chart showing their results. Can you interpret the data to answer to questions below?

1. How many people altogether chose playing in the garden or eating biscuits?
2. What was the most popular choice?
3. Can you work out how many people chose home learning, watching TV and playing in the garden?
4. What was the least popular choice?
5. How many people chose the least popular choice?
6. How many people altogether chose sleeping or playing a games console?
