Year 1 digital painting

## 🔒 E-safety: How technology makes you feel

We can have different feelings when we use technology. It's important to recognise good and bad emotions and what we should do about them.

## Vocabulary

| | | | |
|---|---|---|---|
| **Capturing** | Taking photographs. | **Camera flash** | Burst of light from a device used when an image is hard to see. |
| **Landscape and portrait** | Horizontal and vertical orientation of a device or picture. | **filter** | Colour layer or shade added to change an image. |
| **frame** | space that the image should be in | **fake** | Changes made to an image to alter the appearance or mood of it. |

## What?

**1**
Photographs are a way of capturing places or people in a frame. The camera can use either landscape or portrait formats. When should we use each one?
**2**
There are lots of ways to improve a photograph. Think about the position of the shot, how to frame it and what the subject of the photo is.

**3**
Using light in photography helps to see an image more clearly when it is too dark. Natural light or camera flash are ways to do this.

**4**
Changing the appearance of a photograph can be done by using tools includes using a filter. There are several colours to choice from to create different moods.

**5**
Using knowledge of framing, landscape, portrait and filters, you can identify whether an image is real or fake. Is changing a image okay?

REAL OR FAKE
