

Examples:- Part Part Whole Model

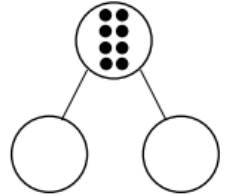

Can you split the whole in two parts.

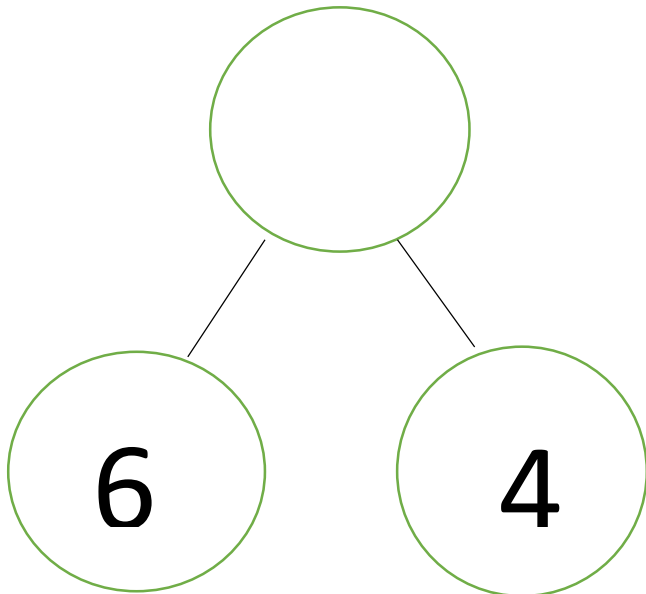

E.g 8

What two numbers can make 8?

use counters/objects or draw in the top circle, then split them between the two bottom circles.

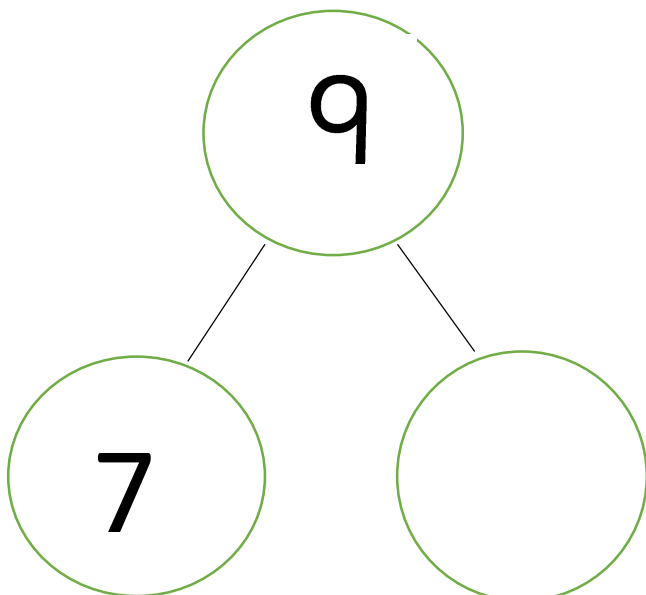

$5+3 = 8$ or $4 + 4 = 8$

Can add the two parts to find the whole

E.g $6 + 4 =$

Use fingers or objects to help you add together.

Can you find the missing part

E.g $9 - 7 =$

Use fingers or objects to help you take away/subtract
