## To convert units of metric and imperial measure

I have written out some measurements of aliens but l'm not sure about the conversions. Can you help me out using the metric and imperial equivalences?

| Zamzoomer |  |  |  |  |
| :--- | :--- | :--- | :--- | :---: |
| Mass |  |  | Height |  |
| 6000 kg | lb | 3.3 m | ft |  |

| Juuhav |  |  |  |  |
| :--- | :--- | :--- | :--- | :---: |
| Mass |  |  | Height |  |
| 225 g |  | lb | 25 cm |  |

| Ulkimean |  |  |  |
| :--- | :--- | :--- | :--- |
| Mass |  | Height |  |
| 450 kg | lb | 1.5 m | ft |

| Phaphe |  |  |
| :---: | :---: | :---: |
| Mass | Height |  |
| g | 2 lb | 25 cm |

| Xernorok |  |  |  |  |
| :--- | ---: | ---: | ---: | :---: |
| Mass |  |  | Height |  |
| 50 kg |  | lb | 90 cm |  |

Why don't you make up some aliens of your own and create their measurements of mass and height?

|  |  |
| :---: | :---: |
| Mass | Height |
|  |  |

|  |  |
| :---: | :---: |
| Mass | Height |
|  |  |
